2006-103-5
Railway accident

On 28th October 2006 at 17 hours 20 minutes, the 5th wagon - a track maintenance vehicle - of a freight train derailed with 1 bogie at Pusztaszentistván stop, between Mende and Süllyás stations.

Factual statements directly connected to the occurrence of the accident

The accident occurred due to the following technical problems:

The derailment was as a consequence of the fact that the bearing box on the right wheel of the second axle (1st bogie) of the wagon had melted and opened.
